Epilogue Opus v. Oracle Guided Learning (OGL)

Oracle Guided Learning (OGL) is being introduced as a freemium offering on select Oracle Applications. It's important to understand what that means and OGL's limitations as compared to Epilogue Opus.

While OGL's freemium offer is limited to a few Oracle apps and a handful of processes, Opus allows unlimited use - processes and applications (Oracle and non-Oracle).
OGL requires JavaScript to be embedded in the target app, making deploying OGL for non-Oracle apps difficult and even unlikely. Opus is truly app agnostic, requiring no-code, no API, no integrations of any kind.

Opus bulk imports Oracle UPK ODARC files into fully editable Opus source files for easy editing and maintenance. OGL does not convert UPK.

 ORACLE Gold Partner

"Epilogue Opus is UPK on steroids. Everything we didn't like about UPK, Opus does better. It's obvious the Epilogue team knows UPK and what was difficult in UPK flows so much better in Opus."

Trish Muir,
Director of Enterprise Resource Management, Michelman, Inc.

Determine which Digital Adoption Platform is best for your needs

OPUS PROVIDES

Full-Stack In-App Guidance
Opus drives digital adoption with in-application guidance that auto-generates more content options than any other DAP for all your critical applications.

Unlimited Content
Opus is your centralized resource for unlimited digital adoption content, pre go-live documentation and post go-live in-application help and guidance.

Zero Learning Curve
Creating content with Opus is fast and easy with Zero Learning Curve, just click "record" and perform the process as you normally would, Opus does the rest.

No Code Platform
Up and running in minutes to support your full enterprise toolset (not just a few Oracle apps) at no additional cost & no code injection required.

UPK Conversion
Opus' bulk converter supports drag and drop import of 100's or 1,000's of UPK ODARC files into fully editable Opus files. OGL does not offer UPK conversion.

Comparing Epilogue Opus to Oracle Guided Learning

	OGL Freemium	OGL	Opus	Comparison Details
Applications	A few select Oracle apps	Pay by the app	Unlimited at same price	OGL pricing is TBD in terms of higher user counts and incremental applications.
Oracle processes	Limited to 15	Full price OGL	Unlimited at same price	OGL Freemium is limited to 15 processes which is unrealistic for supporting even the included apps.
Cross application processes	No	Full price OGL, pay by the app	Unlimited at same price	Cross-application processes, though common, are not supported by OGL freemium, and costly with OGL
Requires embedded Code	Yes	Yes	No	OGL requires JavaScript snippet insertion in other apps which is difficult often not possible. Opus requires no code, or integrations of any kind.
Oracle UPK conversion	No	No	Yes	OGL cannot convert UPK content in any fashion. Opus bulk converts UPK content into fully editable Opus content.
Browser compatibility	Chrome only	Chrome only	Chrome, Edge, IE	Businesses use a variety of browsers.
Desktop apps	No	No	Yes	Businesses continue to have desktop-based apps and clients.
Multilingual Support	No	Yes	Yes	Many customers have global footprints or are located in other geographies.
Live Support	No	Yes	Yes	Projects have tight deadlines, timely response to customer questions and issues is critical.

"Improving the speed to proficiency during technology-driven transformation programs and sustaining that performance well beyond initial deployment is a critical success factor for our clients. Integrating products such as Opus into our adoption approach is central to meeting these client needs. We are building Opus as the enabling technology into a new offering to meet increasing market demand for digital adoption."
